Unusual doors often take you to the unusual worlds

- Mehmet Murat ildan

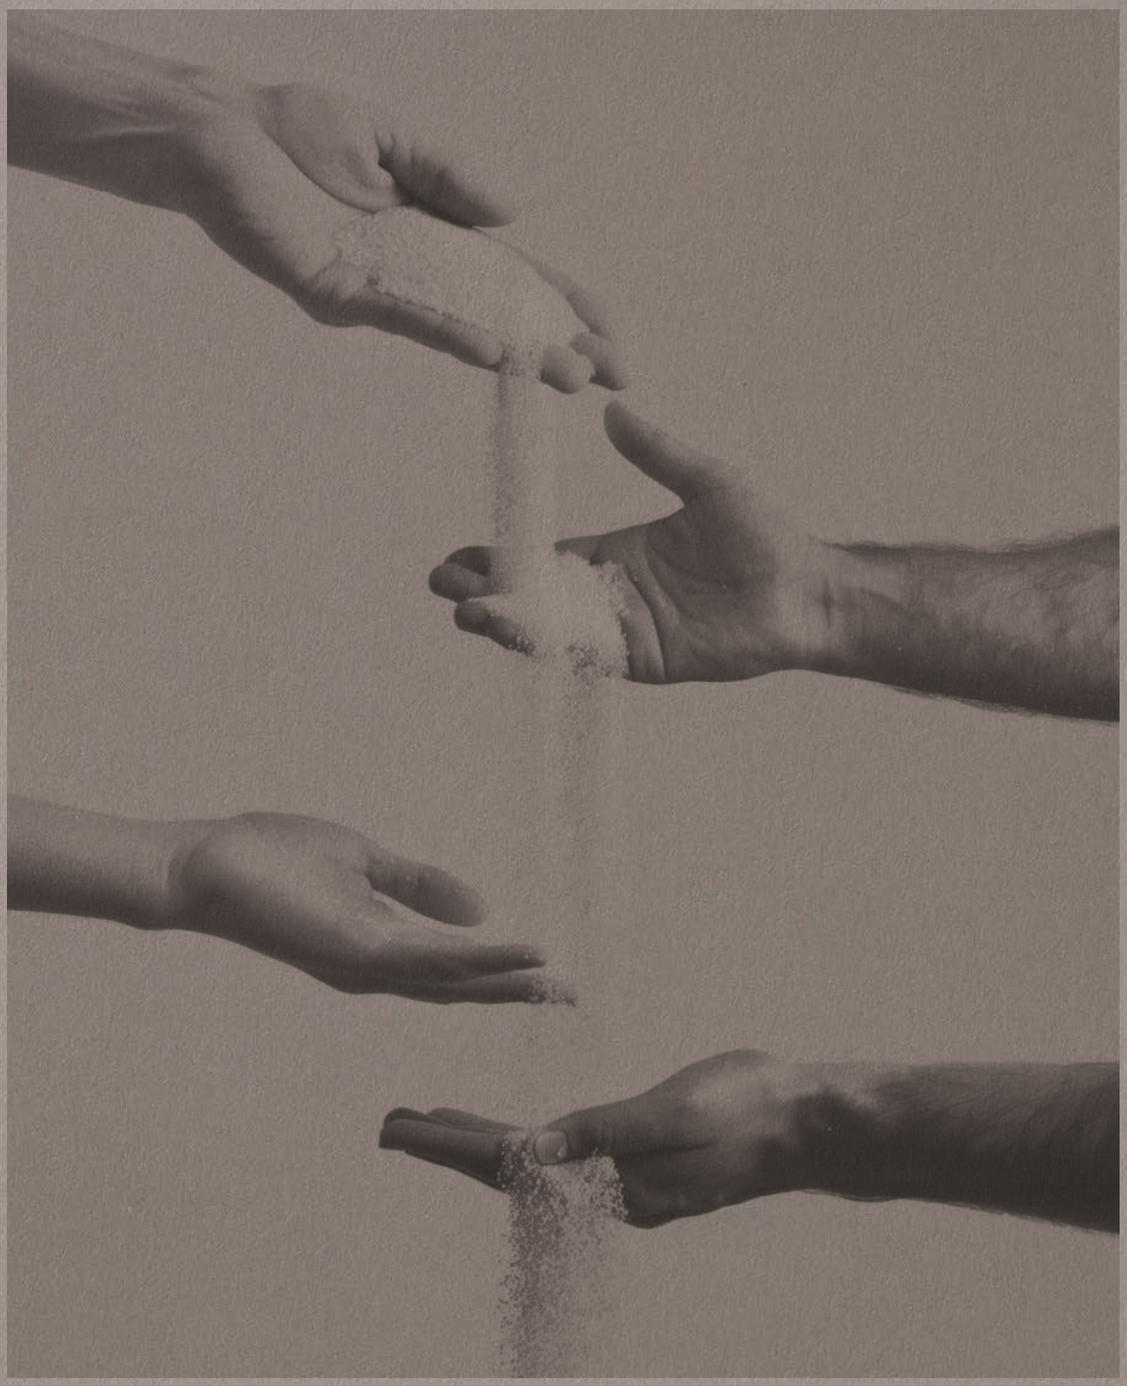

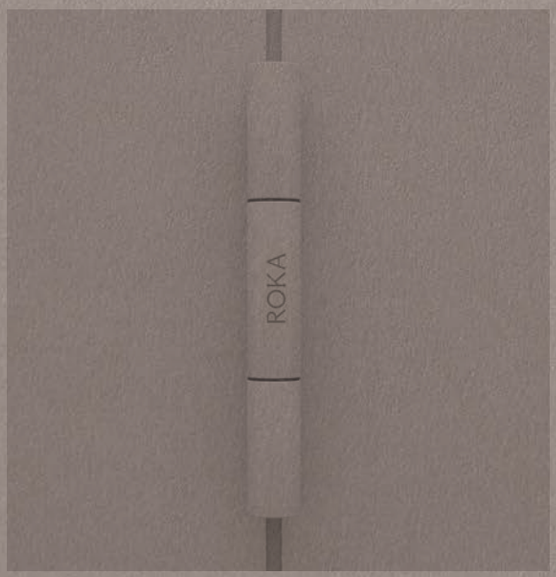

BEHIND DOORS:
A WORLD TO EXPERIENCE

A door is more than an entrance - it is a boundary that separates the outside world from the magic of life inside. It symbolizes the beginning of a journey, provides a link between the outside and the inside, and is a key element that tells a unique personal story. The ROKA Signature collection is based on the belief that there is something extraordinary behind every door. It's not just about aesthetics, it's about the whole experience, the feelings that resonate in every detail.

Every door in this collection is fully customizable: from the choice of materials to the carved details, from the dimensions to the integrated technology, every element is designed to respond to your needs and transform every entrance into a personal masterpiece. When you cross the threshold of a ROKA door, you enter not just a home, but a world where design meets emotion and every detail creates a sense of harmony and well-being.

Craftmanship is
more than creation

ROKA is a symbol of perfection and individuality, where each project is created to meet the specific needs of the customer. Each product is the result of passion and precision, revealing beauty in the smallest details. Here, every material is appreciated and respected for its texture, with a deep understanding of form.

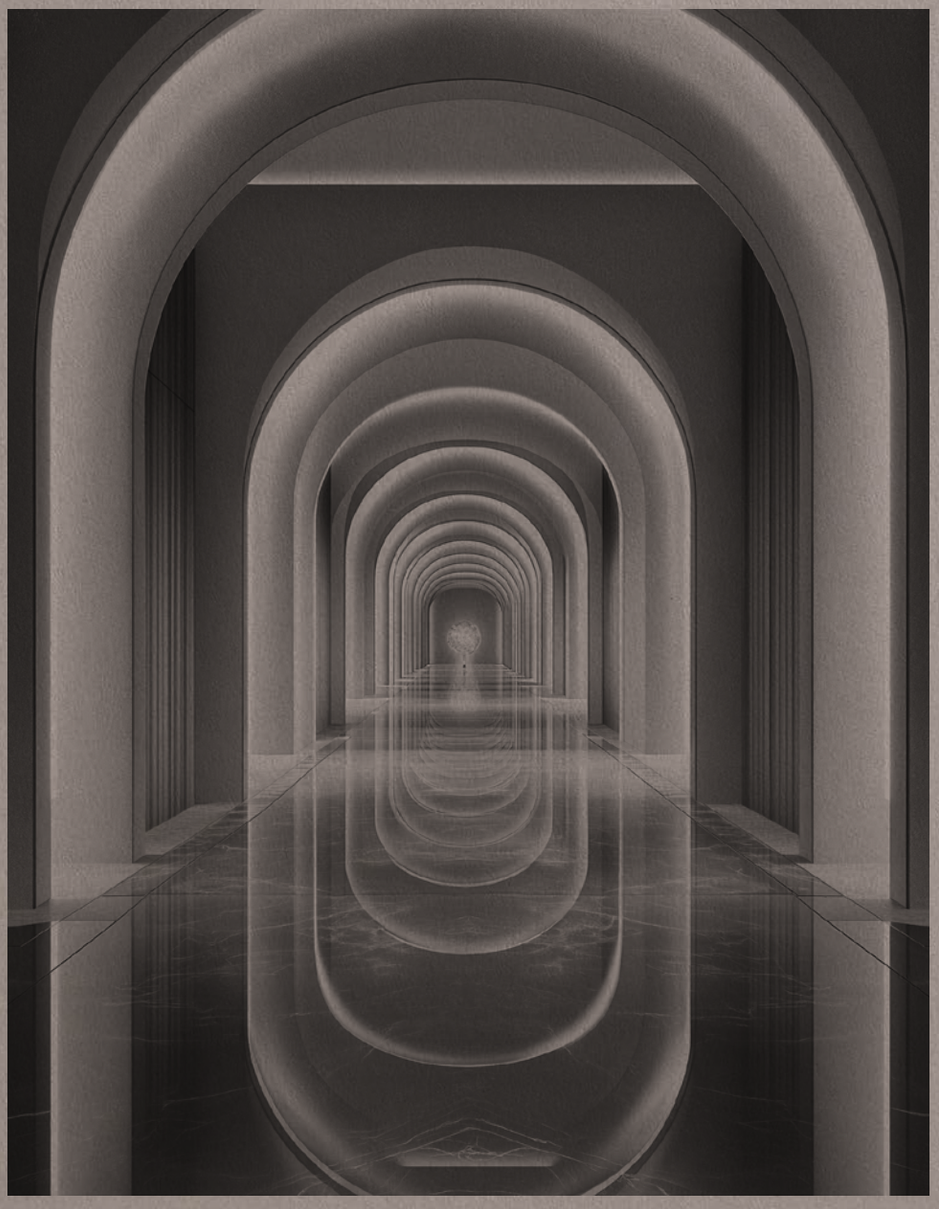

MORE THAN A DOOR - A CONNECTION TO UNLIMITED POSSIBILITIES

In a world where spaces weave their own stories, ROKA doors transcend the ordinary and become a symbol of art, creating entrances that open unlimited horizons. These unique doors harmoniously combine functionality and aesthetics, allowing you to customize every detail to suit your unique lifestyle.
Signature Collection doors are a canvas for your creativity, where your choice of materials, colors and sophisticated designs create a unique composition that captures the character of your home. Every detail radiates individuality and becomes a reflection of your desires and vision. Opening this door is an emotional experience - meeting loved ones, celebrating important moments or finding solace in quiet reflection. Inspired by dreams, our doors connect the everyday to new possibilities, creating a vibrant connection that enriches your life.

More than just an entrance, it's an inspiring framework for your imagination, encouraging you to create spaces that tell personal stories and showcase your style. ROKA doors are the epitome of technological excellence, where innovative engineering meets exquisite craftsmanship. Equipped with modern features such as advanced security systems and unique seals, they combine beauty with a sense of tranquility.
Classic yet modern, they blend easily into a variety of architectural styles, from minimalist elegance to extravagant grandeur. The Signature Collection represents the highest level of entry design, opening the door to a world of endless possibilities. Every story that begins behind that door is waiting to be discovered, and every moment has the chance to be unforgettable. Embrace the extraordinary; create a space that authentically reflects who you are and tell the best stories of your life.

THE ART OF DOORS THAT TELL YOUR STORY

ROKA is an expert in transforming doors into unique elements of a space that fully reflect the personality of their owners. Our philosophy, based on fundamental principles, constantly guides our work and influences every project. These values, essential to our brand, shape our present and our future, allowing us to create products that are not only aesthetically pleasing, but also inspiring, perfectly meeting the individual needs of our customers.

HERITAGE MASTERY

Our creations are a tribute to the history and symbolism they have carried for centuries. Respecting their traditional role in architecture, we aim to give them a new artistic expression, creating personalized pieces that tell their stories. Combining years of manufacturing experience with a passion for fine craftsmanship, our team, supported by innovative technology, creates products that harmoniously combine precise workmanship with modern solutions. Each piece becomes both a functional statement and a personal manifesto in space.

VISIONARY BOLDNESS

At ROKA, visionary audacity drives us to reclaim the art of creating entrances. Since the beginning of our mission, our goal has been to create the finest doors in the world. We do not shy away from challenges, from innovative finishes to materials that once proudly adorned entrances. Each project is a bold challenge to new possibilities, combining sophisticated design with innovative technology, resulting in elements that inspire bold self-expression and tell stories that break design barriers.

TIMELESS INNOVATION

With cutting-edge technologies such as advanced security systems and superior insulation, our doors combine style with convenience and adapt to the demands of modern living. For us, timeless innovation is the harmonious combination of classic aesthetics with innovative engineering solutions that redefine the traditional perception of doors. The solutions introduced make each piece functional and adaptable to the changing needs of users. For us, timeless innovation is the ability to combine enduring values with modernity, providing security and inspiring future generations.

UNCOMPROMISING CRAFTSMANSHIP

Passion and precision are in ROKA's DNA. Each door is created through a carefully considered process in which the selection of materials and details reflect a relentless pursuit of perfection. From design to fabrication, handcrafted precision at every stage of production ensures exceptional quality. Modern design blends harmoniously with classic craftsmanship to create eye-catching pieces that express personality. At ROKA, every detail matters, creating doors that become the heart of any entrance.

SUSTAINABILITY REDEFINED

At ROKA, aesthetics and responsibility blend harmoniously to create a conscious approach to design. Profiles that are almost 80% recycled reflect our commitment to sustainability. Each product is the result of combining modern solutions with environmental awareness and minimizing our carbon footprint. Our doors offer not only functionality and style, but also concern for the future of the planet, creating a new quality of relationship between beauty and care for the environment.

EVERY CHOICE IS A STATEMENT:
WHAT FUTURE ARE YOU CHOOSING?

True prestige is more than design excellence and quality. It is the recognition that beauty can be responsible. Luxury is not about excess, but about thoughtful choices that shape our reality. At ROKA, we believe that the future is being built today - decision by decision, detail by detail. Our doors are not only an expression of excellent craftsmanship, but also a manifesto of responsibility towards the environment and future generations. When you choose with us, you support sustainability and create a legacy that matters.

THE TECHNOLOGY OF THE FUTURE IN YOUR HOME

Aluminum is the material of the future. Durable, lightweight, timeless. But we go one step further. Our doors are made from aluminum profiles, that are at least 80% recycled. This means not only unique aesthetics and perfect functionality, but also a real impact on reducing the consumption of raw materials. We do not look at the present. We look to the future.

WHEN YOU CLOSE THE DOOR, YOU OPEN A NEW ERA

We are part of the circular economy. It's not just a slogan - it's a real action. The aluminum we use to make our doors doesn't begin or end its story with ROKA doors. This is urban mining in practice - instead of tapping the resources of nature, we reclaim them from existing urban structures. This is the architecture of the future.

LESS EMISSIONS, MORE CHANGE

Every gram counts. In the global ecosystem, every choice matters. That's why reducing CO2 emissions is a priority for us. Producing recycled aluminum requires 95% less energy than producing the original raw material. This means that our profiles have a carbon footprint six times lower than standard solutions on the market. This is not a compromise between aesthetics and ecology. It's a new definition of luxury.

ROKA DOORS, A CHOICE THAT MATTERS

When you choose ROKA Doors, you choose more than a door. You are choosing a conscious design, that not only beautifies a space, but also has a real impact on the future. It is not just an investment. It's a statement of values. Join our mission. Build the future with ROKA doors.

UNLOCKING INSPIRATION: THE ART OF SIGNATURE

At the heart of every masterpiece is inspiration - a gentle impulse that shapes not only forms, but also the emotions and stories we hold dear. At ROKA, our door designs are a testament to this endless source of creativity, skillfully captured in elegant lines and organic shapes that invite exploration and interaction. When we reflect on form, it transcends mere visual aesthetics. It becomes an emotional journey that invites us to get closer to the object. Every curve, every angle, every surface reveals a story deeply rooted in nature, culture and the breadth of the human imagination.

Inspiration blossoms in subtle details that exude harmony and elegance, combining the visible with the tactile. It all begins in spaces surrounded by nature, where shapes are inspired by the contours of the earth itself. The warm tones of wood and the refined lines of metal evoke the serenity of time passing, and each design is carefully crafted to evoke emotions ranging from joy and serenity to reflection and nostalgia.

Robert, the Signature collection seems to be more than just a selection of doors. What does this line mean to you?
Robert Karasek: The Signature Collection is the essence of our philosophy at ROKA. It's our signature - the most personal and honest statement of who we are as a brand. We wanted to create something that reflects the life that goes on behind doors, because they are the boundary between the outside world and the space where daily stories unfold, filled with emotions, relationships and memories. The inspiration came from the senses, nature and the primal beauty of the earth. These are doors that speak through texture, color and detail about who we are and what we love. This is also the result of our 31 years of experience in the industry and several years of perfecting the system in cooperation with WICONA. Without this advanced solution, we would not have been able to afford such a unique design.

The collection's tagline, "Behind the Doors," is very poetic. What is behind those words?
RK: Behind every door is a unique story. It could be a home full of joy, where children laugh around a shared table, or a space where someone finds solace after a busy day. Signature doors are designed to be part of those stories. Their design and texture reflect the character of the people who live behind them. "Behind the Doors" is also an invitation to look deeper - into our emotions, our dreams and the way we perceive the world. You mentioned nature as an inspiration.

How does that idea manifest itself in the collection?
RK: Nature is embedded in the DNA of this collection. It starts with the materials - textures that evoke the warmth of sand, the coolness of stone or the smoothness of water. The textures and colors in Signature are inspired by the vitality of the earth, its primal strength and beauty. But it's not just about aesthetics - we wanted the doors to invite you to connect with nature through touch. Every surface, every finish is a sensory experience.

So the Signature doors are not just about aesthetics, but also about emotion?
RK: Exactly. I always say that design shouldn't just be visual - it has to engage all the senses. When you touch a door from the Signature collection, you feel a texture that evokes emotions-a summer walk in the woods, the coolness of morning stone, or the softness of damp earth after a rain. And when you open it, it becomes part of the experience, leading to a place where memories are made.

How does technology fit into all of this? Can nature and modernity coexist?
RK: They have to coexist. At Signature, we combine precise technology with organic aesthetics. We use modern solutionsfrom smart locking systems to advanced insulation-but we try to keep them invisible, so they don't interfere with the natural character of the doors. The idea is that technology should serve life, not dominate it.

You've talked about emotions and senses, but what about individuality? Are Signature doors for everyone?
RK: For anyone who wants their doors to speak their language. The Signature collection is all about personalization – from the

Robert Karasek
Founder & Owner of ROKA

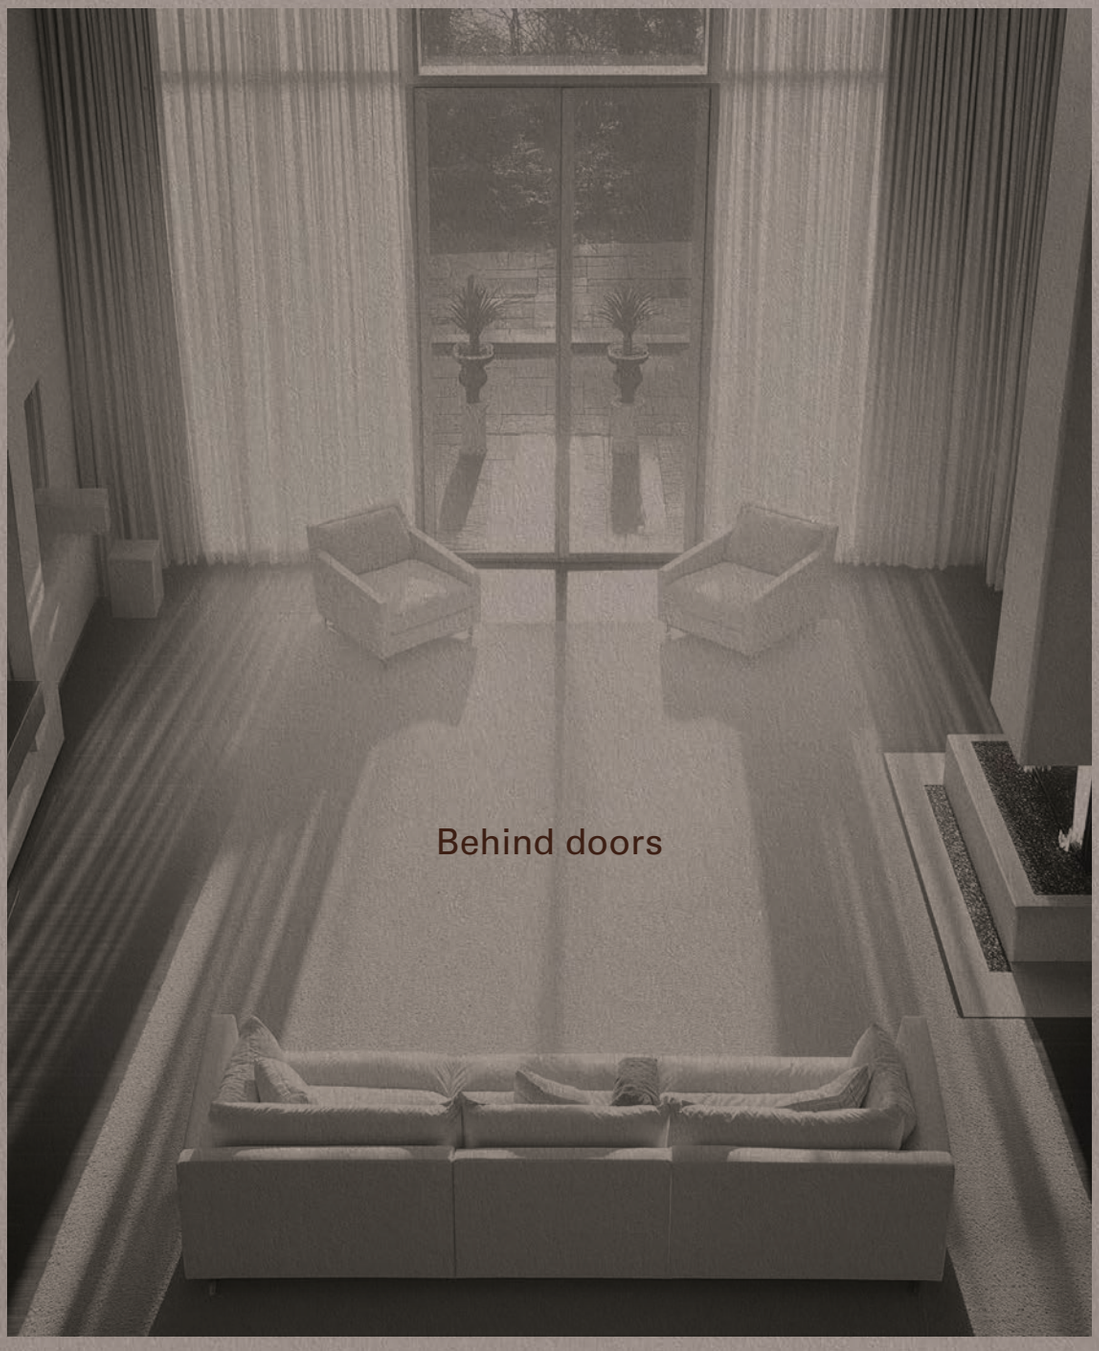

choice of textures and colors to details like the shape of the pulls or the pattern of the panels. Every door is unique because every person is unique. This allows us to create models that perfectly match the character of homes and their owners. It's also a great tool for architects who want to incorporate unique elements into their designs, ensuring that each entrance is unique and tailored to the vision of the space's creators.

What were the most challenging aspects of creating this collection?
RK: The biggest challenge was to combine the pristine beauty of nature with completely new, innovative technological possibilities. We wanted the doors to look like they belonged in their environment while providing the highest level of functionality - from thermal insulation to material durability. We achieved this by working with experts and craftsmen who understand that perfection is in the details.

Was there anything particularly memorable about the process of creating the Signature collection?
RK: The most moving moments were the reactions of people who saw these doors for the first time. During the design phase, when I would bring them into our workshops, I would watch them stop and focus, as if they were discovering something new. Silence would fall. Everyone felt exactly what we were trying so hard to communicate.These moments show that what we do matters - Signature Doors truly engage the senses and the emotions.

In closing, what do you hope people feel when they look at the Signature doors?
RK: I hope they feel a connection. To nature, to home, to themselves. That they see beauty in simplicity, while appreciating the richness of detail. These doors are meant to be more than architectural elements - they’re part of the life that unfolds behind them, full of emotion, passion and authenticity.

Behind doors

DESIGN BEYOND LIMITS

ROKA works with architects and designers from around the world, bringing the concept of the art of creating entrances into the language of architecture. Not long ago, an entrance door was just a dark rectangle in a design, an insignificant part of the whole. Today, architects have top-notch technology in phenomenal design, which opens up enormous creative possibilities.
Our company not only manufactures custom doors, but also actively collaborates with creative minds, facing common challenges to achieve exceptional results. We create the most extraordinary designs in accordance with customers' vision, and more and more often the facade of a building is adapted to the door, which becomes the most important point - the heart of the building. We are witnessing a significant moment in the history of the industry, where innovation and art are coming together to take on new challenges.

BOTH SIDES DESERVE EQUAL ATTENTION

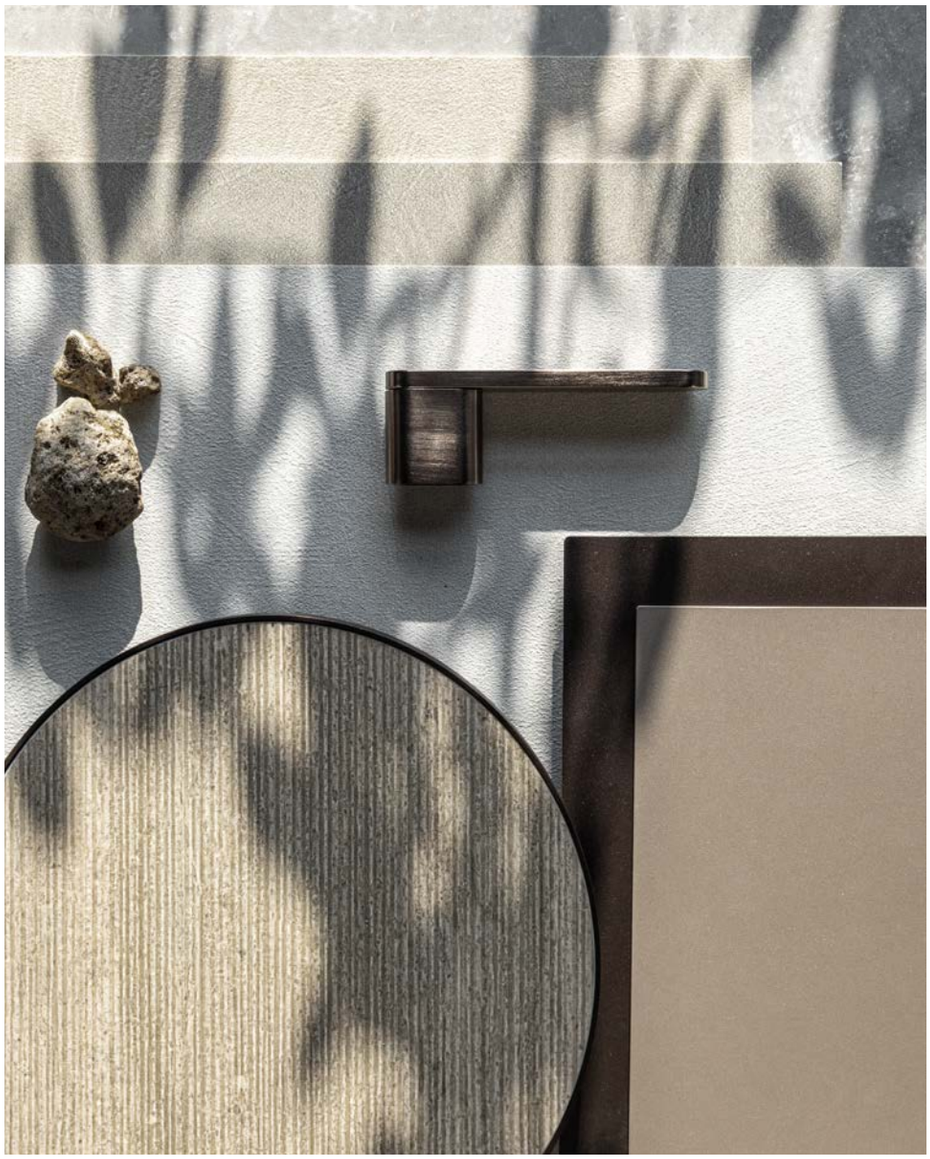

The Signature Collection is not only a functional element of a space, it is also one of the most important manifestations of the individuality of its owners. How can you make every entrance tell your story? Choosing a door is a decision that diametrically changes the character of both the external entrance and the interior, introducing subtlety and expression. Imagine a door that becomes an integral part of your home, highlighting its unique style. It can be an elegant decoration that blends in perfectly with the interior design, or a bold accent that catches the eye.

These elements can take the form of an eye-catching painting, an artistic sculpture, or even be subtly flush with the wall, becoming a natural extension of it. In addition, doors can be the focal point of a room, enhancing the space with unique details.

The possibilities for customization are endless. Explore a variety of materials, colors and textures to create a door that perfectly reflects your lifestyle and taste. Whether you strive for minimalist harmony or dramatic contrast, every choice becomes an expression of your personal vision.

ROKA focuses on complete customization, allowing the creation of doors that transform both exterior and interior spaces. Both sides of the door can be completely different, offering a unique combination of different styles. As a result, each door becomes a unique creation that not only opens up a space, but also gives it a unique character. Ultimately, the door becomes not only a portal to the interior, but also a beautiful interpretation of your history and style.

MATCH & DESIGN

Match
SIZE

Match
SHAPE

Match
MATERIAL

Discover Match & Design, a concept that encourages creative exploration and door design where every detail is carefully considered. Choose the perfect size for your space and specify a design shape that captures the character of your entrance. Personalize the look of both the inside and outside of the door, giving each a unique style with a variety of materials and colors. Decide if you want the finish to be the main feature of the door or if you want your door ornament to stand out with its unique design in the form of a personalized door pull. Match & Design is more than a series of choices - it's a thoughtful journey that transforms your front door into a manifestation of your dreams and personal stories. With ROKA Doors, every choice builds a bridge between what is and what could be, inspiring you to create doors that reflect your style and imagination.

Imagine you have a white sheet of paper in front of you, ready for your creativity. Next to it is a box full of colorful elements - ornaments, textures, finishes, materials - waiting to bring your ideas to life. This is Match & Design - a space where every choice is an opportunity to create something unique that reflects your taste and style.
This blank sheet of paper is a metaphor for a door panel that you can make your own. Every detail, from the texture to the type and shape of the handles, can be personalized. When you choose Signature, you engage your senses and your imagination - every choice contributes to a unique design.
This combination of creative freedom and modern technology makes your door not only a functional element, but also a manifesto of your individuality. Innovative solutions give you complete control over every aspect, from aesthetics to performance. Open the box and create a design that says more about you than a thousand words.

NOT JUST AN ENTRANCE
CUSTOMIZE THE ENTIRE FACADE

A facade is not just the exterior of a building; it's the face your home presents to the world, making a statement even before its interior is revealed. How much can it interact with its surroundings? It sets the tone, shapes the atmosphere and offers a glimpse of the life it protects. At ROKA, we believe a facade should go beyond functionality to become a masterpiece that reflects your personality and aspirations.

Imagine an entrance that goes beyond the limits of traditional doors. Our company provides architects and designers with the tools to transform entrances into striking architectural statements. By seamlessly extending the finish from the door to the surrounding facade, the entrance becomes an integral part of the design narrative, not just a transition point. Such continuity opens up endless possibilities: doors can be subtly concealed, harmoniously integrated into the facade, or highlighted as a bold accent. Whether your vision is subtle cohesion or dramatic contrast, the sky's the limit.

The facade of your home is more than just a shield; it frames the most important moments of your life. It greets you after a long day, welcomes your loved ones when they arrive, and remains a silent witness to the rhythms of your life. At ROKA, these moments take on a lasting sense of elegance and precision. Each facade celebrates individuality and creative expression, complementing a variety of architectural styles-from elegant minimalism to the timeless majesty of classic forms.

Solutions to unfold the possibilities of your house. Shape and dimensions fit your idea of coherent aesthetic and inspiration.

Thresholds for pivot hinged doors

LOW THRESHOLD

Specification

This low threshold, with a height of 15.2 mm, is made of black-painted or anodized aluminum and enables direct installation into existing subfloors – an ideal solution for renovation projects. Thanks to the high-quality thermal break combined with an automatic drop-down seal, it provides excellent insulation and airtightness. The elegant, slim profile is characterized by a subtle design. The system is complemented by cover caps and an integrated automatic drainage system.

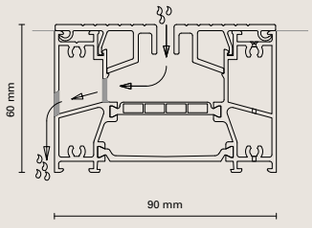

HIGH THRESHOLD

Specification

This threshold, equipped with an integrated linear drainage system, is designed for new construction projects where it can be connected to the building's sewage or drainage infrastructure during the construction phase – an exceptionally functional solution. It features a high-performance thermal break combined with an automatic drop-down seal, ensuring outstanding insulation and airtightness. The slim, elegant form is distinguished by its subtle design. The system is completed by cover caps and an integrated automatic drainage system.

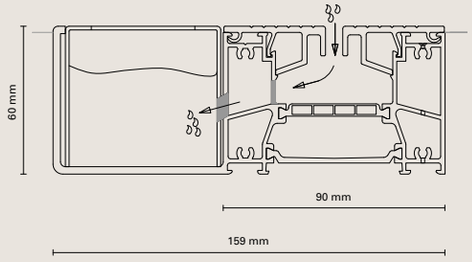

THRESHOLD WITH DRAINAGE GUTTER

Specification

This threshold, including a gutter and linear drainage system, is intended for new construction projects where it can be connected to the sewer system or building water drainage infrastructure during construction – a highly practical solution. It is equipped with a high-quality thermal break and an automatic drop-down seal, providing excellent thermal insulation and airtightness. Its slim and elegant profile is characterized by a subtle design. The system is completed with cover caps and an integrated automatic drainage system.

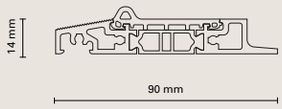

Thresholds for side hinged doors

LOW THRESHOLD

Specification

The 14 mm high threshold is made of aluminum, painted or anodized in black. The integrated thermal break ensures structural stability and high airtightness. It is equipped with an aesthetic EPDM cover that provides additional insulation and effectively conceals fastening holes.

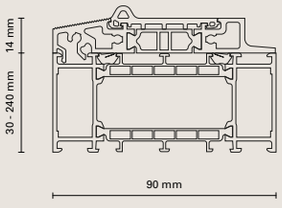

LOW THRESHOLD WITH EXTENSION

Specification

This threshold, with a height of 14 mm and an extension, is made of aluminum and finished in black paint or anodization. The integrated thermal break ensures excellent stability and airtightness. The threshold is fitted with an aesthetic EPDM cover that provides extra insulation and effectively conceals fastening holes.

Extensions available: 30, 40, 50, 60, 70, 80, 90, 110, 119, 130, 150, 200, 240 mm

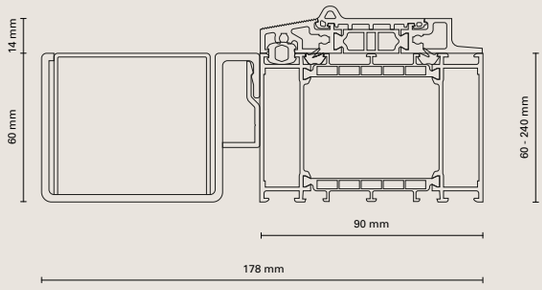

THRESHOLD WITH DRAINAGE

Specification

This 14 mm high threshold features an extension and an integrated drainage gutter. It is manufactured from aluminum and is black-painted or anodized. The integrated thermal break provides high structural stability and airtightness. The threshold includes an aesthetic EPDM cover that offers additional insulation and effectively hides fastening holes.

Extensions available: 60, 70, 80, 90, 110, 119, 130, 150, 200, 240 mm

Locking mechanism

The fingerprint reader is an elegant combination of modern technology and timeless design. It provides instant access through advanced biometric identification, eliminating the need for keys or codes.

instinct by MACO

PIVOT DOORS – R-CORE SYSTEM – INSTINCT BY MACO

RS 100
For door leaves up to 4000 mm in height:

- 6 x Guard+ with leaf pressure function
- Integrated emergency power buffer (UPS)
- Gateway central unit with acoustic module
- Bluetooth interface

RS 200
For door leaves up to 6000 mm in height:

- 4 x Guard+
- 4 x Guard
- Integrated emergency power buffer (UPS)
- Gateway central unit with acoustic module
- Bluetooth interface

HINGED DOORS – R-CORE SYSTEM – INSTINCT BY MACO

RS 300
For door leaves up to 2500 mm in height:

- 2 x Guard+
- 1 x Guard
- Integrated emergency power buffer (UPS)
- Gateway with acoustic module
- Bluetooth interface

RS 400
For door leaves up to 3000 mm in height:

- 3 x Guard+
- Integrated emergency power buffer (UPS)
- Gateway with acoustic module
- Bluetooth interface

INSTINCT BY MACO – MOBILE APP

With an intuitive mobile app, you can manage access to your home from anywhere in the world. Whether you're granting one-time access to a courier or checking who entered your home—you are always in control.

APP FEATURES:
- Flexible access management (including temporary access)
- One-time entry codes
- Day unlock mode
- Child safety lock function
- Access history and logs
- Construction mode (for installation teams)

TOP-TIER SECURITY

The INSTINCT by MACO system complies with DIN EN 1627–1630:2021-11 burglary resistance standards:

- RC2 resistance class
- Fully concealed locking points
- Tamper-detection sensors on every locking element
- Integration capability with alarm systems and building automation

MACO M-TS – FULLY AUTOMATIC LOCK

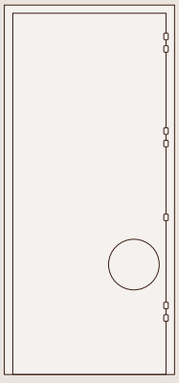

The M-TS lock represents the pinnacle of automatic locking technology—offering ultra-fast and nearly silent operation, unlocking in just 0.3 seconds. Motor-assisted for smooth and reliable performance, it is fully compatible with Smart Home systems, making it an ideal solution for modern, demanding users.

Features:

- Day unlock mode
- Integration with Smart Home apps and systems
- Automatic locking/unlocking
- Smooth and quiet operation
- Suitable for right- and left-opening doors
- Optional: fingerprint reader or code keypad

7-POINT LOCK

RS 1773

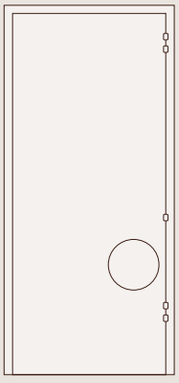

Hook

Latch

7-point locking system: 4 bolts, 3 hooks
Application: For doors 2401–4000 mm in height
Security class: Up to RC3

5-POINT LOCK

RS 1772

Hook

Latch

5-point locking system: 3 bolts, 2 hooks
Application: For doors up to 2400 mm in height
Security class: Up to RC3

GU-SECURY

GU Secury locking systems combine advanced technology with unique design, perfectly complementing the aesthetic of ROKA doors. Thanks to a modular structure and a variety of models, GU Secury adapts flexibly to individual user needs—offering unmatched elegance and the highest level of security.

Specifications:

- Compatibility: Works with BKS access control systems
- Mechanism: Simple and reliable locking/unlocking
- Integration: Compatible with SECUREconnect
- Materials: Stainless steel
- Options: Available in manual and automatic versions
- A-Opener: Optional servo motor available

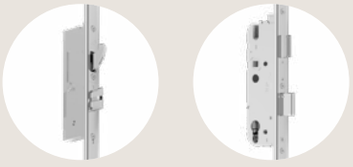

GU-SECURY ADR AUTOMATIC-OPENER RS 1760

Hook Latch A-opener

5-point automatic lock with motor drive, compliant with DIN 18040, compatible with intercom systems; automatically locked and unlocked via motor.

GU-SECURY DR4 MANUAL RS 1350

Hook Latch

5-point manual lock with three bolts and two hooks; mechanically locked and unlocked; compatible with electric strike.

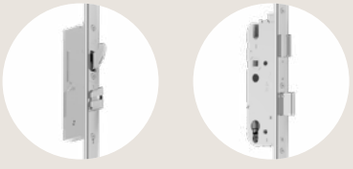

GU-SECURY ADR AUTOMATIC-OPENER SERVO RS 1761

Hook Latch A-opener

5-point automatic lock with servo drive; operated by key or handle/pull bar.

GU-SECURY ADR AUTOMATIC RS 1750

Hook Latch

5-point automatic lock with three bolts and two hooks; mechanically opened and automatically locked.

DOOR STRIKE RS 2100

Electric strike with day function: latching without locking, remote unlocking, enhanced security, access control integration.

DOOR STRIKE RS 2110

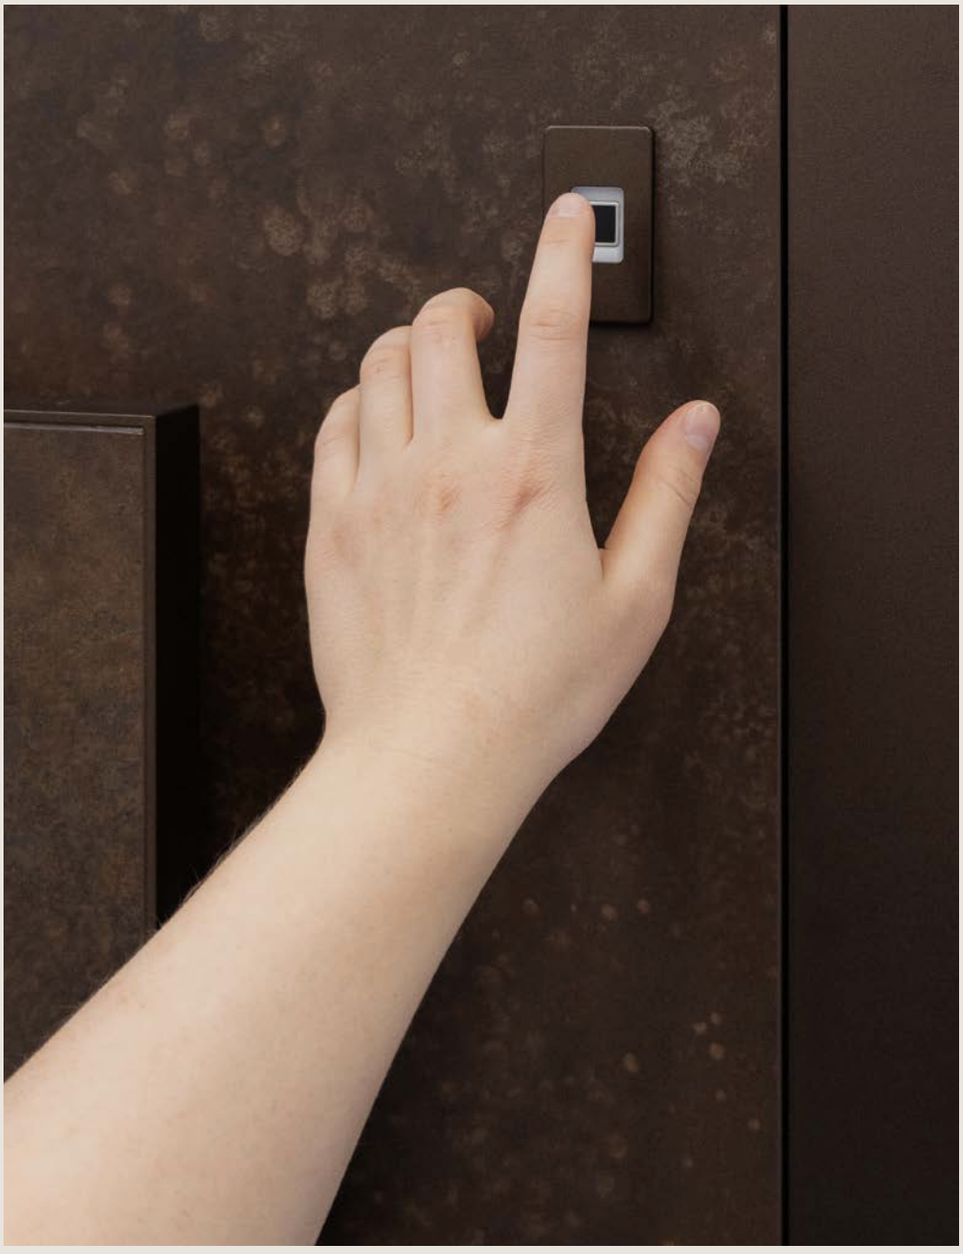

Electric strike without day function: remote unlocking, enhanced security, access control integration.

GU VTS 735 CONCEALED SELF-LOCKING CLOSER WITH SLIDE RAIL AND LOCKING MECHANISM RS 2320

Concealed door closer with slide rail and hold-open function: increases security, reduces drafts, noise, and energy loss.

Access Control Systems

The ekey dLine reader ensures maximum comfort when using ROKA doors – access modes and system functions can be conveniently configured and controlled via mobile app.

Specifications:

- Operating temperature range: -25°C to +70°C
- Flat surface sensor
- Finishes: stainless steel, black lacquer, or color-matched to the door
- High resistance to manipulation (e.g., fake fingerprints)
- Intuitive smartphone-based administration
- Fingerprint unlocking
- Remote permission management
- Intuitive user and role management
- Up to 20 fingerprints per system
- Easy synchronization of fingerprints across devices
- Access logs – activation, deactivation, deletion
- Assign different functions to different fingers
- Remote door unlocking
- Push notifications
- Integration with Amazon Alexa
- Remote technical support

The ekey dLine fingerprint readers offer advanced biometric identification in a sleek form. They recognize users in a fraction of a second and allow individual functions to be assigned to specific fingers. Data synchronization, remote control, and voice assistant compatibility (Alexa) make ekey dLine the most intelligent biometric solution on the market.

Installation and Application: System operated via the ekey bionyx app:

- Local Mode – basic functions, no need for Internet/Wi-Fi
- Plus Mode – extended features, requires registration and network connection

Terrazzo Karo

The type of ceramic used significantly affects the weight of the door and the arrangement of the ceramic elements on its surface. For structural and technological reasons, additional ceramic divisions may be necessary for large doors. The maximum weight of a door sash is 180 kg with a traditional hinge and 500 kg with a pivot hinge. The final division layout and the use of specific ceramic formats must be agreed upon with the manufacturer during the design process, considering the technical parameters of the door and installation requirements.
